

HYDROFOIL INSTRUCTIONS

Please prepare the following: 1 x Phillips screwdriver, 1 x 10mm wrench,
1 x Drill with 6.35mm drill bit

1. Placing the Hydrofoil on the cavitation plate as per the drawing
with ribs facing upwards.

2. Make sure both the right and the left fins line up perfectly.
3. Drill 4 x 6.35mm holes using hydrofoil as template.
4. Insert the screws from the bottom side up and secure it with
locking nuts.
